Computer and Network Security in Higher Education

Mark Luker and Rodney Petersen, Editors

A Publication of EDUCAUSE
Index

A
Academic freedom, 4, 7. See also
   Intellectual freedom
Academic values, 3–5
Acceptable use policy, 66
Access: convenience vs. security in,
   16; equal, 5; equity and diversity
   goals and, 8; fairness in, 9; Internet,
   and intellectual freedom, 4; policies
   for dealing with abuses of, 9; pri-
   vacy and confidentiality considera-
   tions with, 8; vulnerability due to
   ease of, 78; wireless, VPNs for,
   76–77
Administration, security education
   for, 91–92
Advanced Networking with Minority-
   Serving Institutions (AN-MSI)
   Security Committee, 8
Alerts, security, 97
American Association of University
   Professors, 13n2
American Council on Education, xix
American Library Association
   (ALA), 5
Application-based security, 84–86
Arnone, M., 48
Articles, for delivering security educa-
   tion, 97–98
Association of College and University
   Policy Administrators (ACUPA),
   policy procedure information from,
   64–65
Association of Research Libraries, 13n2
Attorneys, in-house, security educa-
   tion for, 94
Auditors: risk analysis supported by,
   42; security education for, 93
Authentication: appropriateness of,
   10; central-service approach to,
   82–83; enterprise directories for,
   84, 86
Authentication and authorization sys-
   tems, privacy practices of, 8
Autonomy, as academic value, 4

B
Barman, S., 63
Barton, T., 73, 84
Bickel, R. D., 53–54
Biometrics, 12
Border firewalls, 75
Boyer, E. L., 2
Briney, A., 78
Bruhn, M., 59
“Bugtrak Mailing List Archive,” 81
Business continuity, 25–26

C
Campus directories, 84
Campus police, security education
   and, 93–94, 101
Cantor, S., 86
Carnegie Mellon University, CERT Coordination Center, 95
Carroll, L., 45
Cassat, P. C., 46
Cassidy, D., 33
Cavanaugh, L., 64
Center for Academic Integrity, 13n2
Center for Internet Security (CIS): CISECURITY toolkit, 80; security benchmarks, 40–42
CERIAS (Center for Education and Research in Information Assurance and Security), Purdue University, 103
“CERT Advisory,” 79
CERT Coordination Center, security education offered by, 95
Certification, of security professionals, 27–28
Certified information systems security professionals (CISSPs), 27
Checklists, as element of policy, 63
Chief information officers (CIOs), 22, 86–87
Chief security officers (CSOs), 22–23
CISECURITY toolkit, 80
Civil liability, 49
Civility, as principle for security in higher education, 6
Clarke, R., xix
Columbia University, 13n2
Community: as academic value, 3–4; as principle for security in higher education, 6
Computer Science and Telecommunications Board, xvi
Computers: firewalls in, 81; as target of hackers, 31, 77. See also Host-based security
Computing Technology Industry Association (CompTIA), certification program, 27
Confidentiality, as principle for security in higher education, 7–8
Consultants, hired for security purposes, 20–21, 28, 29
Content filtering, 11
Convenience, balancing security with, 16
Cornell University, policy procedure information from, 64
Cybersecurity insurance, 56

d
Definitions, as element of policy, 62
Desman, M. B., 63
“Developing a Strategy to Manage Enterprisewide Risk in Higher Education” (Cassidy and others), 33
Distributed denial-of-service (DDOS) attacks, xi, 31
Diversity, as principle for security in higher education, 8
Dors, N., 86
Duderstadt, J. J., 2, 3
Dunn, J., 77
Duty, in negligence law, 50–51

e
E-mail: encrypted vs. unencrypted, 85; filtering content of, 11
Eaton, J., 4
Education. See Security education
EDUCAUSE/Cornell Institute for Computer Policy and Law, models for campus IT security policies, 101
EDUCAUSE/Internet2 Computer and Network Security Task Force: Framework for Action, xviii–xix; participated in development of national security strategy, xvii; principles for implementing security in higher education, 6–10, 13n2; security policies information from, 65–66; security resources from, 103
Encryption, necessity of, 84–86
Enterprise directories, 84, 86
Equity, as principle for security in higher education, 8
Ethernet, shared, 75
Ethics, as principle for security in higher education, 9–10
Events, for delivering security education, 97

F
Facilitator university model, 53–55
Faculty, security education for, 92
Fair information practices, 5, 7–8
Fairness, as academic value, 5
Family Educational Rights and Privacy Act, 92
FBI Academy, 102
Firewalls: appropriateness of, 10; border, 75; host-based, 81; multiple, 75
Foster, A., 18
Fraser, B., 74
Fraser, M., 76
Freedom. See Academic freedom; Intellectual freedom
FTP, encrypted vs. unencrypted, 85

G
Global information assurance certification (GIAC), 27
Government, independence from, 4
Gray, T., 75
Green, R., 49
Grimes, S., 76
Guidelines, as element of policy, 63
Gwaltney, R., 81

H
Hackers: computers as target of, 31, 77; vulnerability to, xii, 31–32, 78, 79
Handbooks, security, 95–96
Handouts, for delivering security education, 98
Health care professionals, security education for, 93
Health Insurance Portability and Accountability Act (HIPAA), 93, 102
Higher education: academic values in, 3–5; mission of, 2; operational environment of, 2–3; potential security practices for, 10–12; principles for implementing security in, 6–10, 13n2; security conditions with liability potential in, 47–48; security vulnerability of computers in, xii, 31–32, 78, 79
Higher Education Information Technology Alliance, xix
Host-based firewalls, 81
Host-based security: best practices for, 78–83; defined, 78; importance of, 77–78

I
Identity management, 83
Indiana University, response to security breaches improved at, 68–70
Information protection programs (IPPs), steps for establishing, 15–16
Information security. See Security
Institutional policies: elements of, 61–64; process of developing and maintaining, 64–65. See also Security policies
Institutional risk analysis. See Risk analysis
Insurance, cybersecurity, 56
Integrity, as principle for security in higher education, 9–10
Intellectual freedom, 4, 7, 16. See also Academic freedom
International Information Systems Security Certification Consortium, 27
Internet access, intellectual freedom and, 4
Internet Audit Project, security vulnerabilities revealed by, 31–32
“Internet Security Systems,” 80
Internet2 Middleware initiative, 83–84, 86
Intrusion detection systems (IDSs), 11–12, 76
Intrusion prevention systems, 76
“IT Security Cookbook,” 66
IT security. See Security
IT staff. See Security staff

J
Jacobson, H., 49
Joint Information Systems Committee, 63
Jopeck, E., 33

K
Kenneally, E., 51
Kerberos, 82–83
King, C. M., 63
Klingenstein, K., 83
Kohl, J., 82
Krebs, B., 56

L
Lake, P. E., 53–54
Leadership: security, 21–23; and security architecture, 86–87. See also Security staff
Legal liability. See Liability
Liability, 45–57; civil, 49; and cybersecurity insurance, 56; and facilitator university model, 53–55; and negligence law, 50–53; security conditions with potential for, 47–48; and team approach to risk management, 56–57
Libraries, privacy measures of, 5
Logging, 8, 11, 82

M
Mandia, K., 66
Marchany, R., 31
McIntyre, D. J., 52
McRobbie, M., 19
Meetings, for presenting security education, 95
Microsoft products, virus protection when using, 78–79
Middleware: defined, 83; security considerations with, 83–84
Mission, higher education, 2
Mission Continuity Planning (Qayoumi), 33
Murrell v. Mount St. Clare College, 52

N
National Association of College and Business Officers (NACUBO), risk assessment information, 33
National Infrastructure Protection Center (NIPC), risk assessment model, 33
National Institute for Standards and Technology Security Resource Center, 103
National Institute of Science and Technology (NIST), risk assessment information, 33
National Science Foundation, 6, 13n2, 86
National Strategy to Secure Cyberspace, xii, xvi–xviii, 16
Negligence law, 50–53; breach in, 50, 52–53; duty in, 50–51; and facilitator university model, 53–55; and foreseeable harm, 51–52; general principles of, 50
Network scanning utilities, 80
Network security: best practices for, 75–77; defined, 74
Neumann, C., 82
Nichols, R. K., 63
NIMDA worm virus, 79
“Nmap—Network Mapping Software,” 80

O
Oblinger, D., 1
Olsen, F., 19
Online quizzes, for security education, 96
Openness, balancing security with, 16
“OpenSAML,” 86
“The OpenSSL Project,” 85
Operational environment, higher education, 2–3
Operational security, 25
Outsourcing security, 20–21, 28, 29

P
Packet filtering, 10
Parents, security education for, 92
Partnerships, security obtained through, 20–21
Passwords: central authentication service for, 82–83; encrypted vs. unencrypted, 84–86; enterprise directory for managing, 84, 86
Patches, 32, 81–82
Payne, S., 89
Peltier, T. R., 63–64
Personnel. See Security staff
Pescatore, J., 90
Petersen, R., 59
Physical security, 24–25
Planning. See Security plan; Security policies
Policies. See Security policies
Policy statement, as element of policy, 61–62
Postel, J., 80
Princeton University, 48–49
Principles, for implementing security in higher education, 6–10, 13n2
Privacy: as academic value, 5; as principle for security in higher education, 7–8
Procedures, as element of policy, 62
Prosise, C., 66
Purpose statement, as element of policy, 61

Q
Qayoumi, M. H., 33

R
Rationale statement, as element of policy, 61
Read, B., 18, 48
Recor, J., 15
References, as element of policy, 63
Research and Educational Networking Information Sharing Analysis Center (REN-ISAC), xii
Researchers, security education for, 92–93
Responsibility, as principle for security in higher education, 9–10
Risk analysis, 31–42; benefits of, 32; case study of, at Virginia Tech, 33–42; CIS security benchmarks for, 40–42; models for, 33; need for, 31–32, 42; as step in designing host-based security plan, 79
Risk assessment. See Risk analysis
Risk management: and insurance, 55–56; team approach to, 56–57
Roesch, M., 76
Roles and responsibilities, as element of policy, 62
Ryan, D. J., 63
Ryan, J.J.C.H., 63

S
"Safe SQL Slammer Worm Attack Mitigation," 75
Salaries, of certified security professionals, 28
Salomon, K. D., 46
"San Diego Super Computer Security Advisory," 85
Scanning, 11
Scope, as element of policy, 62
Security: balancing convenience and openness with, 16; functions of, 23–26; goals of program for, 60; obtaining support for, 18–20; principles for implementing, in higher education, 6–10, 13n2; range of practices for, 10–12
Security + certification, 27
Security administrators, responsibilities of, 26
Security alerts, 81
Security analysts, responsibilities of, 26
Security architecture, 73–87; application-based security element of, 84–86; CIO’s role with, 86–87; context for, 73; host-based security element of, 77–83; middleware and directory services element of, 83–84; network security element of, 74–77; technical resource on, 74.
See also Security infrastructure
Security breaches: due process for dealing with, 9; examples of preventable, 17–18; by insiders, 90; institutional responses to, 52–53; monitoring, 20; response to, improved by security policies, 68–70
Security convergence, 24–25
Security education, 89–104; delivery methods for, 95–98; need for, 89, 90; obstacles to, 90–91; recommended approach to, 99–103; targets audiences for, 91–95; tips for communicating, 98–99
Security engineers, responsibilities of, 26
Security incidents. See Security breaches
Security infrastructure: institutional characteristics influencing, 17; steps for establishing, 18–23. See also Security architecture
Security plan: developing, 18; obtaining support for, 18–20; potential security practices in, 10–12
Security policies, 59–70; acceptable use policy as component of, 66; and elements of institutional policies, 61–64; and goals of information security program, 60; information security policy statement vs., 59–60; issues to be addressed by, 65–68; necessity of establishing, 9; process for developing and maintaining, 64–65; response to security breach improved with, 68–70; security education program based on, 100–101; sources of information on, 65–66, 101
Security professionals. See Security staff
Security Self-Assessment Guide for Information Technology Systems (Swanson), 33
Security staff: certification of, 27–28; common job titles and responsibilities for, 22–23, 26; number of, and size of organization, 23, 24, 25; outside consultants as, 20–21, 28, 29; salaries of, 28; security education for, 94–95
Security Targeting and Analysis of Risks (STAR) process for risk assessment, 33–42
Security teams, 23
Semjanov, P., 82
Shibboleth, 86
Siri, L., 31
Sniffers, 11
“SQL Slammer” attack, xiii, 75
Staff, security education for, 92, 94–95. See also Security staff
Standards, as element of policy, 63–64
Stanton v. University of Maine, 51–52
Students: computer equipment of, 3; security education for, 92
Suess, J., 73
Support, obtaining, for information security, 18–20
Swanson, M., 33
System Administration, Audit, Network, Security (SANS) Institute: certification program, 27; security education offered by, 95; security policies information from, 66
System logging service, 82

T
Telnet, encrypted vs. unencrypted, 85
Thibeau, B. E., 46
Training, incorporating security education in, 98. See also Security education
